FOREWORD

The Chamber of Commerce and Industry of Serbia publishes sectoral publications (CCIS bulletins) on the business of agriculture, industry and services, which, for the seventh year in a row, show indicators and information for 18 economic activities, according to the organizational structure of the CCIS associations. These quarterly and annual analyses of economic trends and indicators of the development of the domestic economy inform the members of the chamber system, representatives of the business community and the professional public about leading branches, sectoral and macroeconomic topics, as well as business indicators.

The bulletins present the activities and services of the Chamber of Commerce and Industry of Serbia, as well as economic initiatives launched with the aim of improving the business environment, creating stable and sustainable business conditions and strengthening of the potential for the domestic economy to perform on domestic and foreign markets.

All information, news and analyses published in the bulletins are the result of the activities of the single chamber system and the domestic economy. The analyses use official data from domestic and foreign institutions, chamber research results and information available through the data exchange system on business platforms. In addition to quarterly CCIS Bulletins, annual editions are also published in Serbian and English.

All previously published Bulletins are available on the website of the [Chamber of Commerce and Industry of Serbia](#).

Jelena Vasić,
Editor

The construction industry of the Republic of Serbia has been expanding recently and is one of the key economic growth drivers. Today, the construction industry of Serbia comprises more than 11,000 companies employing over 100,000 workers. The previous year (2021) was marked by huge investment activities in the field of building construction, which participated in the gross domestic product with more than 5% and the value of works was increased by as much as 35% and the number of employees was higher by almost 10%. In the first quarter of 2021, the construction industry recorded the highest year-on-year growth in the gross added value, as compared to other industries, and amounted to 19.6% in relation to the same quarter of the previous year. Earnings in the construction industry, in 2021, were higher by more than 5%, whereas in December, a total of 2,916 building permits were issued, which is higher by 34%, if compared with December 2020. Investments to Serbia will be continued in the coming period, particularly to infrastructure, therefore, we expect such positive trends in the construction industry to be continued.

During 2021, we did our best to support your business, answer your current issues, launch initiatives for amendments and supplements to regulations, represent your interest before decision makers and jointly improve the business environment. Together we presented the potential of the construction industry at the Expo 2020 Dubai global exhibition, which was organized under the slogan Connecting Minds, Creating the Future. We hope that this slogan may depict the time ahead of us, when we will continue to support you so that through connecting of relevant stakeholders we could jointly keep improving growth trends in the construction industry.

The Open Balkan: A Path Leading to Four Freedoms

The Open Balkan is an economic zone established by three countries in the Balkan region: Albania, North Macedonia and Serbia. By establishing this economic zone, Albania, North Macedonia and Serbia aim to increase trade and cooperation and improve mutual bilateral relations. The Open Balkan is a support to the current regional initiatives, their implementation, and a response to the requirements of the economy, companies and real life. The Initiative launched under the name Mini Schengen has been renamed to the Open Balkan Initiative, and all the economies in the region can join it.

ACTIVITIES

of the CCIS Association
of Construction Industry

CCIS RCCI Subotica Section of Civil Engineering and Building Construction Established

The Board of the Association of Construction Industry passed the Decision on establishing the Section of Civil Engineering and Building Construction for the territory of the CCIS-RCCI of the North Bačka Administrative District with a registered office in Subotica. The Section will operate in accordance with the provisions of the Rules of Procedure of the Group of the Association of the Chamber of Commerce and Industry of Serbia.

Meeting of the Board of the Association

At the meeting of the Board of the Association, which was held on 17 March 2023, the members expressed their written opinion in favour of the referral of the Initiative for the development of qualification standards for the educational profile - facility maintenance technician. At the proposal of the Association of Geodetic and Construction Schools of Serbia, the Chamber of Commerce and Industry of Serbia joined the process of adopting a new qualification standard and opening this educational profile in construction schools, in terms of supporting the initiative based on the needs of the economy.

Meeting of the Board of the Group of Civil Engineering

The meeting of the Civil Engineering Group Board was held on 13 April 2023, at which it was agreed to submit an initiative to the Ministry of Construction, Transport and Infrastructure regarding disruptions in prices on building materials market and their impact on the operations of domestic construction companies.

Meeting of the Board of the Group of Building Construction

The meeting of the Board of the Group of Building Construction was held 16 on May 2023, at the Chamber of Commerce and Industry of Serbia. After the approval of the minutes from the previous session, the members were presented with an overview of the initiatives that the Association of Construction Industry forwarded to the relevant ministries. The businessmen expressed their satisfaction that the Ministry was sent an initiative for the preparation of the National Construction Development Strategy, which they believe is necessary, in order to determine the direction of construction development, taking into account the continuous growth of this industry over the last years. Also, those present were informed about the announced introduction of the electronic construction log as a way of significantly facilitating the digitization of business. It was presented that they were working on the Portal within the web page of the Association of Construction Industry on the website of the Chamber of Commerce and Industry of Serbia, where the prices of basic building materials can be followed.

Meetings concerning the Free Trade Agreement with China

At the meetings of the Board of the Association of Construction Industry, the Board of the Group of Cement and Concrete, the Board of the Group of Production of Bricks, Tiles and Baked Clay Products and the Board of the Group of Exploitation and Processing of Decorative Architectural and Building Stone, which were held on 3 August 2023, the topic of discussion was the Free Trade Agreement with China. In order to continue the negotiations on the conclusion of the Free Trade Agreement with China, a proposal related to the liberalization of Chinese customs was submitted to the members of the Boards of the Groups. It was agreed that they would consider the proposal and submit their views on the mentioned tariffs, on the proposed degrees of liberalization of goods from Serbia when importing them to China. The focus is on goods that have potential for export to China.

Meeting concerning the Free Trade Agreement with the United Arab Emirates

The meetings of the Board of the Group of Cement and Concrete and the Board of the Group of Production of Bricks, Tiles and Baked Clay Products were held on 29 September 2023, where the Free Trade Agreement with the United Arab Emirates was discussed. As part of the first stage of negotiations on concluding a comprehensive economic partnership agreement with the UAE (which was held on 18 and 19 September 2023), it was agreed that both sides would exchange initial offers for concessions in goods. The members of the Board of Groups were delegated to submit an explanation of their views if they considered that some products should be protected from imports from the UAE, as well as for those where there was an interest in exporting them to the UAE.

Meeting of the Group of Designing and Group of BIM Technology

The joint meeting of the Group of BIM Technology and the Group of Designing was held on 22 November 2023. Those present were informed about the initiatives sent to the competent institutions in 2023, as well as about other activities of the Association of Construction Industry of the Chamber of Commerce and Industry of Serbia, and the establishment of two new groups - the Group of Land Surveyors and the Group of Sustainability and Stability in Construction - was announced, as well as the creation of a new working groups within the Association, for work on the Guidelines for the specific application of the rules of green construction and the sustainability of construction facilities. A Draft Work Plan of the Association of Construction Industry of the Chamber of Commerce and Industry of Serbia as well as the Work Plan of the Sector for Housing and Architectural policy, Public Utility and Energy Efficiency of the Ministry of Construction, Transport and Infrastructure were presented at the meeting. Members of the Groups also highlighted a number of difficulties they face in their work, and agreed that the Association should prepare new initiatives and send them to the competent authorities in 2024.

Meeting of the Group of BIM Technology

The regular meeting of the Group of BIM Technology was held in the Chamber of Commerce and Industry, on 5 October 2023. On that occasion, the members of the Group agreed to continue working on the documents "Guidelines for Investors" and "Guidelines for building Construction Designers". Also, it was agreed to establish working groups with the Chamber of Commerce and Industry of Serbia.

Public Debate on a Draft Law on Amendments to the Law on Planning and Construction

At the public debate on the Draft Law on Amendments to the Law on Planning and Construction, which was held on 20 February 2023 in the Chamber of Commerce and Industry of Serbia, a proposal was made to ensure the continuation of the growth trend in construction and the improvement of this industry. The proposed amendments have a positive effect on the improvement of the electronic system (CEOP), the introduction of new elements of the Green Agenda, the increase in the responsibility of authorized persons in the procedures for issuing construction documents, the abolition of the Law on Conversion with compensation to a certain category of persons, the abolition of *lex specialis* for linear infrastructure facilities, as well as on increased care for protected natural and cultural areas.

Expert Meeting of Project Designers and Suppliers – from Foundation to Roof

The Association of Construction Industry of the Chamber of Commerce and Industry of Serbia and the Belgrade Chamber of Commerce and Industry organized an expert meeting of project designers and suppliers entitled From Foundation to Roof, on 24 May 2023. The meeting was attended by over thirty company representatives. Sion Net, in cooperation with APC by Schneider Electric and Alumil presented their production capacities and results. Alumil presented innovative systems for modern projects, i.e. new products of glass external partitions of a Smartia type, which are made of thin aluminium profiles that can be finished in various ways in several colours and shades.

The expert meeting From Foundation to Roof which was held on 26 September 2023, was attended by more than 50 project designers from the architectural and construction industry. Aluminium systems for VENT substructures, application of the system in combination with EQUITONE fiber cement

panels, as well as variations in the assembly method with the VENT system were presented at the meeting. In addition, fibre cement panels, advantages compared to other facade coverings, application in energy-efficient construction, interior design variations, as well as examples of interesting reference projects in the world were presented.

The Swedish Interested in Cooperating with Serbian Construction Companies

Serbian construction companies are reliable partners with extensive experience and knowledge. Our project designers and engineers are in high demand around the world and are welcome to join the largest construction projects planned in Sweden - it was highlighted at the Supplier Day event. The Ambassador of Sweden pointed out that the Supplier Day is a unique opportunity to strengthen Swedish and Serbian business partnerships and cooperation in the transport infrastructure sector, which could significantly contribute to the further development of transport infrastructure in Sweden.

Geotechnical Aspects of Construction Industry and Earthquake Engineering

The international symposium titled Geotechnical Aspects of Construction Industry and Earthquake Engineering was held in Vrnjačka Banja, from 1 to 3 November 2023. On that occasion, numerous professional papers were presented in the field of geotechnical engineering in the project design and building objects on roads, buildings and hydro technical structures, models in geotechnics, numerical methods and prediction of the behavior of structures, protection of excavations and tunnels, stability of slopes and landslides, solid waste landfills and ecological aspects of geotechnics, technical regulations and recommendations in the field of geotechnics and earthquake engineering, etc.

Keeping Track of Building Material Prices

The market of building materials and elements showed instability after the Covid-19 pandemic and the beginning of the war in Ukraine, which was reflected in the dynamics of the execution of construction projects. In order to keep track of current trends and price changes, the Association of Construction Industry of the Chamber of Commerce and Industry of Serbia decided to form a database on prices of selected building materials. The goal of establishing this price database is to keep track of impact of changes in prices of building materials on the implementation of construction projects. In addition, one of the ideas is that companies operating in the construction industry can have an insight into their current developments. The plan is to collect data once a month, and to expand the list according to the needs of companies. The prices (wholesale) were collected from the official internet websites of thirty warehouses in the territory of the Republic of Serbia.

Training on Carbon Border Adjustment Mechanism (CBAM) for Cement Industry

Within the framework of the Program on Capacities for Trade Policies (C4TP), which is supported by the Government of Switzerland, on 18 October 2023, the Ministry of Environmental Protection and the Chamber of Commerce and Industry of Serbia held a sector-specific training for cement plants as obligators of the new Carbon Border Adjustment Mechanism (CBAM), introduced by the European Union. CBAM means a system of charging taxes depending on the carbon content of certain products imported into the EU from countries where climate policies are less ambitious than the European ones. Initially, it will apply only to a selected number of products: iron and steel, cement, fertilizer, aluminium, and electricity. The SBAM Regulation officially entered into force on 17 May 2023 and began the implementation, in its transitional phase, on 1 October 2023, when the obligations related to reporting only, with the first reporting period for importers ending on

31 January 2024. At the training, guidelines were given regarding the creation of documentation on the methodology of monitoring carbon dioxide emissions, defining the plant, process, time periods and parameters that will be monitored.

BIM and Infrastructure Conference

In cooperation with the Group of BIM Technology, the Association of Construction Industry of the Chamber of Commerce and Industry of Serbia organized a conference called - BIM and Infrastructure. This event was held in order to present examples from the practice of using BIM technologies in infrastructure projects to a wider academic and other community. From 1 January 2028, large infrastructure projects in Serbia will have to be designed in BIM technology, that is, BIM technology will become a legal obligation. The amendments to the Law on Planning and Construction, project design bureaus will have a greater role in the coming period.

Expert Meeting - Look into 2024

In the organization of the Association of Construction Industry, an expert meeting titled Look in 2024 was held, where current topics of importance for the construction industry were discussed, and novelties expected by construction companies in 2024 were presented. The innovations foreseen by a new Law on Employment of Foreign Citizens and its by-laws were presented, as well as key changes to the Law on Planning and Construction, with reference to the by-laws that were adopted in 2023. After the guests' speeches, the attendees could ask questions, among which the priority ones were - issues of sliding scales and disposal of construction waste.

REGIONAL INFORMATION

RSD 600 Million for Women Entrepreneurship

Belgrade Chamber of Commerce and Industry

The Government of the Republic of Serbia adopted the Decree on establishing the Program for the entrepreneurship development through financial support for female entrepreneurship in 2023. The funds determined by the Program are intended for financial support to newly founded and existing female entrepreneurs, as well as micro and small companies, which are registered with the Business Registers Agency, and whose founder and legal representative is a woman.

Introduction to *Lean Six Sigma*

Belgrade Chamber of Commerce and Industry

The successful operation of a company is reflected in the constant improvement of its quality of products and services and can be achieved by combining two management concepts: Lean Management and Six Sigma. Due to the great interest in learning about these methods, the Day - o - Introduction to Lean Six Sigma workshop was held in the CCIS - Belgrade Chamber of Commerce and Industry, on 5 October 2023, where, through interactive work and concrete examples, the participants were shown on how the sigma level is defined, using a special set of tools and methods for identifying, proving and removing the causes of insufficient quality.

Workshop Family-Owned Companies – whether to Transfer the Management to the Next Generation or Sell It

Belgrade Chamber of Commerce and Industry

The workshop on the topic of Family Companies - whether to Transfer It to the next Generation or Sell It was held on 24 October 2023. The aim of the workshop was to present the advantages and disadvantages of the sale or continuation of the companies and to show the process of conducting the transaction. The best practices in transferring ownership and management to the next generation were presented, as well as the alternative of selling the company to a strategic or financial investor.

Fifth Bridge in Novi Sad Got a Building Permit

RCCI of the South Bačka Administrative District
Novi Sad

The Provincial Secretariat for Construction issued a building permit for the construction of a bridge between Ratno ostrvo and Petrovaradin. According to the Decision on issuing a building permit, Roads of Serbia is allowed to build an access road, a bridge and hydrotechnical installations. This will be the fifth bridge over the Danube in the area of Novi Sad, and besides being part of the Fruška Gora Corridor - at the city level, the bridge is planned to be used as a bypass connecting the Belgrade-Subotica highway with Petrovaradin, i.e. with other places along the Corridor.

37 New Projects in Vojvodina

RCCI of the South Bačka Administrative District
Novi Sad

In order to initiate significant investments in Vojvodina, in 2023, the implementation of projects in the areas of traffic infrastructure, water supply, water protection, local and regional economic development, health care and sports development continued. The Provincial Government provided enough funds for the implementation of new 37 projects and financing of ten multi-year projects.

Subotica Gets a Scientific and Technology Park

RCCI of the North Bačka Administrative District
Subotica

In October 2023, the company D.O.O. for the management of the Subotica Free Zone launched a project aimed at establishing a Science and Technology Park. The Free Zone signed the cooperation agreements with 70 business entities from various fields: from school institutions to business representatives. The primary intention of establishing the Science and Technology Park is the integration and expanded cooperation of science and business, but also the determination of sports and entertainment content for the users of the Free Zone.

An Airport Planned To Be Build in Kikinda

RCCI of the North Banat Administrative District
Kikinda

The City of Kikinda announced the construction of an airport right next to the state road IB-13, in the direction of the Bašaid settlement, southwest of Kikinda. It is planned to equip a modern air terminal, on a total area of about 54.24 hectares. Technical documentation at the conceptual and main project level was prepared for the airport complex.

Development of the Municipality of Opovo

RCCI of the South Banat Administrative District
Pančevo

The most significant project of the Provincial Government in the Municipality of Opovo is the construction of the local Opovo-Debeljača road. It was invested in agriculture, then in the construction and rehabilitation of sewerage system, the construction of new fishponds and land consolidation procedures. Investments were made in culture, the reconstruction of the water supply network, as well as in the development of tourist potential.

Second Stage of Infrastructural Works in the Sever Industrial Zone in Vršac

RCCI of the South Banat Administrative District
Pančevo

The second stage of infrastructural equipping of the Sever Industrial Zone began with works on the construction of access roads, which is partly financed by the Provincial Government and partly from the city budget. The first industrial zone called Technology Park is completely inhabited by industrial plants, so it was necessary to build a new one that will cover an area of 220 hectares.

Hansgrohe Officially Opened in Valjevo

RCCI of the Kolubara and Mačva Administrative District
Valjevo

The German company Hansgrohe opened its sanitary equipment factory in Valjevo. Its products can be found in numerous prestigious five-star and boutique hotels, private villas and corporate offices all around the world.

Serbia's Business Environment Improvement

RCCI of the Kolubara and Mačva Administrative District Valjevo

Given that the Government of the Republic of Serbia, together with the World Bank, continues to improve and simplify the business environment in order to identify obstacles to business, on 31 January 2023, an interactive workshop was held with representatives of companies from the Kolubara and Mačva Administrative Districts. In addition to the identification of problems, proposals for solutions were presented, which were sent to the Government of the Republic of Serbia for further consideration and implementation.

Wacker Neuson d.o.o. New Production Facility

RCCI of the Pomoravlje and Šumadija Administrative District Kragujevac

The company *Wacker Neuson d.o.o.* from Germany, which has been successfully operating in Serbia for more than ten years, completed the first 20,000 square meters of its own production facility at the end of 2022. At the same time, the construction of a new 30,000 square meters of production space commenced. All this is a part of a large investment cycle, after which, finished construction machines of this world brand should go from Kragujevac into the world.

200th Anniversary of Guilds in Kragujevac

RCCI of the Pomoravlje and Šumadija Administrative District Kragujevac

On 6 December 2023, the Regional Chamber of Commerce and Industry of the Šumadija and Pomoravlje Administrative Districts celebrated the Chamber's Day and the 200th Anniversary of Guilds in Kragujevac with the award ceremony for the business year 2023. Prince Miloš issued the Order on establishing guilds in Kragujevac in 1823, the first of its kind in Serbia, which represents the beginning of organizing and regulating the work of business associations and the economic environment in Serbia.

An Airport on Zlatibor Soon

RCCI of the Zlatibor Administrative District Užice

The idea of building an airport for sports airplanes in Zlatibor was born thirty years ago. In October 2023, the local self-government of Čajetina submitted a request for determining the public interest in the selected location. The construction of this airport is important for improving the tourist offer, and represents a necessity in the intensive development of tourism on this mountain.

Initiative for Constructing a Bridge between Serbia and Romania Signed

RCCI of the Braničevo and Podunavlje Administrative District Požarevac

In Golubac, an initiative was signed for the construction of a bridge between Serbia and Romania at the entrance to the Đerdap gorge, which will undoubtedly contribute to the faster development of the Danube region. The initiative with the Municipality of Golubac was signed by six border municipalities from Romania, which they will send to the competent ministries and governments of the two countries. The bridge should span 370 meters of the Danube and would be the only one from Smederevo to Kladovo.

Knauf Insulation Reconstructed a Factory in Surdulica

RCCI of the Jablanica and Pčinja Administrative District Leskovac

Knauf Insulation, a company from Surdulica, has completed a reconstruction worth more than EUR 20 million. In addition to this significant investment, the factory is getting another 15 new workers this year. In Surdulica, a strategically extremely important material is produced – rock wool, which saves energy and at the same time protects the users of buildings from fire and noise. Knauf Insulation permanently invests both in the production process and in the environment protection.

Draft Law on Amendments to the Law on Citizenship of the Republic of Serbia

RCCI of the Nišava, Pirot and Toplica Administrative District Niš

On 18 April 2023, the wording of a Draft Law on Amendments to the Law on Citizenship of the Republic of Serbia was presented in the CCIS-RCCI Niš. Following the completion of the public hearing, it was agreed that the Ministry of the Interior, based on the proposals and suggestions, will prepare a report on the conducted public hearing and publish it on the website of the Ministry of the Interior and on the e-Konsultacije portal.

IPA Bulgaria–Serbia Programme, 2021–2027

RCCI of the Nišava, Pirot and Toplica Administrative District Niš

In the organization of representatives of the Local Office of the Joint Secretariat for the Implementation of the Interreg VI-A IPA Bulgaria-Serbia Program, members of the Strategic Board in full session participated in the meeting, which was held in Pirot, on 17 and 18 October 2023. During these two days, training on the process of identifying project ideas, integrated territorial development (ITD), as well as the assessment of cross-border effects and justification in the assessment process were carried out. After the administrative review of the project ideas, members of the Strategic Board evaluated the contribution of individual ideas to the territorial strategy and, accordingly, decided on those projects that have the greatest contribution.

Training on Enforcement of the Rulebook on the Safety of Children's Playgrounds

RCCI of the Nišava, Pirot and Toplica Administrative District Niš

In cooperation with the Ministry of Economy of the Republic of Serbia, on 13 June 2023, a training was held on the enforcement of the Rulebook on the Safety of Children's Playgrounds. The main topic of the training was the obligations of business entities taken over in the part of the Rulebook that deals with conformity assessment, drafting and content of the Declaration of Conformity. One of the reasons for launching the campaign is the planned market inspection activities of the Ministry of Domestic and Foreign Trade in the field of safety equipment and surfaces for children's playgrounds.

Promotion of the Digital Europe Project

RCCI of the Nišava, Pirot and Toplica
Administrative District Niš

A presentation of the Digital Europe Program was held in the Science and Technology Park Niš, on 11 August 2023, the aim of which is to improve the digital transformation in the European Union, and it is also open to candidate countries. Through this program, which lasts until 2027, Serbia focuses on the areas of supercomputing, artificial intelligence, data and computing in the cloud (Cloud Computing), as well as on the areas of advanced digital skills and advanced use of technologies.

ECONOMIC ACTIVITY

in the Construction Industry

Relative Importance of the Activity – Gross Value Added

According to the data of the Statistical Office of the Republic of Serbia, the gross value added (GVA) of the construction industry, in 2022, amounted to EUR 4.3 billion, which accounts for 8.4% of the total realized GVA of the Republic of Serbia, with the year-on-year real drop rate of 7.0%.

In the structure of the gross value added of the construction industry, the share of specialised construction activities amounts to 36.5% (EUR 1.2 billion). The realized GVA in the construction of buildings amounts to EUR 1.1 billion (32.0% GVA of the construction industry), and in the civil

engineering it amounts to EUR 1.0 billion (31.5% of the construction industry). The realized GVA in the manufacture of other non-metallic minerals products amounts to EUR 354.8 million (4.3% of the manufacturing), and in the architectural and engineering activities; technical testing and analysis, it amounts to EUR 589.7 million (26.4% of the sector of professional, scientific and technical activities).

The highest year-on-year GVA growth was registered in the architectural and engineering activities; technical testing and analysis (6.5%), whereas a decline in gross value added was recorded in construction of buildings and civil engineering, 17.8% and 10.2%, respectively.

(in %)**

Source: SORS, precalculation by Centre for SAAPP (CCIS).

Note: For the calculation of GVA in construction industry, the following areas of activity are included according to CA(2010): 23-Manufacture of other non-metallic mineral products, 41-Construction of buildings, 42-Civil engineering, 43-Specialised construction activities, 71-Architectural and engineering activities; technical testing and analysis.

Companies and Entrepreneurs

According to the calculations of the Chamber of Commerce and Industry of Serbia, and based on the data of the Business Registers Agency, in 2023, the total of 18,379 companies operated in the construction activities, which accounts for 13.4% of the total registered companies in the Republic of Serbia. Out of that number, 6,893 companies are registered for the construction of buildings (37.5%),

5,225 of them for specialised construction activities (28.4%), and 4,512 companies for the architectural and engineering activities; technical testing and analysis (24.5%). The lowest number of companies (717) is registered in the manufacture of other non-metallic mineral products.

In addition to companies, in 2023, about 48,200 entrepreneurs were engaged in the construction activities.

Number of Issued Building Permits

In 2023, the number of issued building permits amounted to 31,216, presenting the increase of 6.4%, related to 2022. In comparison to 2019, the number of issued building permits in 2023 increased by 42.9%, which is a clear indicator of intensive construction works in the territory of the Republic of Serbia. In the five-year period (2019–2023), the average annual growth rate of the number of issued building permits was 9.3%.

According to the data collected of 2023, value of construction works done on the territory of the Republic of Serbia increased by 16.1% at current prices, while, at constant prices, increase was 11.2% relative to the 2022. During 2023, the value of construction work performed in the Republic of Serbia on buildings and other structures increased by 14.9% in current prices, while the value of construction work performed abroad decreased by 19.4% compared to 2022.

Employment

According to the data of the Statistical Office of the Republic of Serbia, in 2023, the total of 2.3 million employees were registered in the Republic of Serbia at legal entities and with entrepreneurs. In the construction activities, the number of employees at legal persons and entrepreneurs in 2023 reached 177,962, which is higher by 4.8% as compared with 2022.

The majority of employees is in the specialised construction activities, 61,416 (year-on-year growth

of 3.2%) and in buildings, 32,156 (year-on-year drop of 0.5%), whereas the lowest number of employees is recorded in the manufacture of other non-metallic mineral products, 14,516 (year-on-year drop of 3.7%).

In the total number of employees in the Republic of Serbia, the share of employees in the construction activities is 7.7%. The five-year period (2019–2023) average growth in the number of employees in the construction activities amounts to 5.3%.

Salaries and Wages

In the period January–December 2023, the average salaries and wages paid out in the Republic of Serbia amounted to EUR 1,011, whereas the average salaries and wages without taxes and contributions (net) stood at EUR 734. The growth in gross and net salaries and wages, in the period January–December 2023, as compared with the same period in 2022, amounted to 14.8% nominally, i.e. 2.4% in real terms.

In 2023, the highest average salaries and wages were paid out in civil engineering (EUR 1,115), presenting the increase of 10.3%, as compared with the average salaries and wages in the Republic of Serbia, as well as in the architectural and engineering activities; technical testing and analysis (EUR 1,090), which is higher by 7.8%, as compared with the Republic average. The average salaries and wages are lower in the activity of specialised construction activities and buildings, if compared with the Republic average, by 29.5% and 17.5%, respectively.

Foreign Trade

According to the data of the Statistical Office of the Republic of Serbia, the export of bricks, cement, concrete, plaster, stone and other building materials, in 2023, amounted to EUR 102.1 million, presenting the increase of 6.3% as compared with 2022, and accounting for 0.4% of the total exports of goods of the Republic of Serbia. In 2023, the import value amounted to EUR 104.9 million, which is higher by 13.5%, as compared with 2022, and accounts for 0.3% of the total imports of the Republic of Serbia. Consequently, the deficit in the foreign trade in construction products stood at EUR 2.7 million, with the coverage of imports by exports of 97.4%.

According to the data of the National Bank of Serbia, the export of construction services generated EUR 244.7 million, with the realized year-on-year growth in exports of 27.6%. The average annual decrease in exports in the five-year period (2019–2023) amounts to 3.2%. In the structure of the export of services, 43.8% account for construction services in the economy of the country collecting data, and 56.2% account for construction services abroad.

In 2023, the import value stood at EUR 164.8 million, with the realized year-on-year drop in imports of 6.3%. The average annual growth rate of imports in the five-year period (2019–2023) amounts to 1.9%. In the structure of the imports of services, 67.8% (EUR 111.7 million) account for construction services in the economy of the country collecting data, and 32.2% (EUR 53.1 million) account for construction services abroad. The surplus in the foreign trade in services, in 2023, amounted to EUR 80.0 million.

Total Realized Investments

The total realized investments in fixed assets in the construction activities, in 2022, amounted to EUR 849.4 million, out of which 38.5% were realized in civil engineering (EUR 327.4 million), 22.3% in architectural and engineering activities; technical testing and analysis (EUR 189.1 million), 16.8% in construction of buildings (EUR 143.1 million), 14.7% in manufacture of other non-metallic mineral products (EUR 124.9 million) and 7.6% in specialised construction activities and buildings (EUR 65.0 million).

In the structure of these investments, the investments in domestic and imported equipment had the largest share (47.5%). Lower investments were made in buildings and civil engineering (41.2%), while the remaining 11.4% account for investments in intellectual property- research and development, software, databases and other.

Foreign Direct Investments

According to the preliminary data of the National bank of Serbia, in 2023, the total net inflow of FDIs in the Republic of Serbia, on ground of investments of non-residents, amounted to EUR 4.5 billion.

In the construction industry, the architectural and engineering activities, the net inflow of EUR 1.0 billion was realized, which accounts for 22.4% of the total FDIs in the Republic of Serbia. In the construction industry, the highest net inflow of FDIs was recorded on ground of investments of non-residents in the amount of EUR 853.4 million, while it amounted to EUR 158.2 million in the architectural and engineering activities.

In the five-year period (2019–2023), the total net inflow of FDIs in the construction activities amounted to EUR 4.7 billion, and the highest inflow was recorded in 2022 (EUR 1.5 billion).

Note: In accordance with the "Manual for the preparation of the balance of payments and international investment position no. 6, IMF", the mentioned economic branch includes: **Construction; Architecture and engineering activities; technical testing and analysis**. Industries are classified according to the statistical classification of economic activities of the European Community (NACE Rev. 2, 2008).

Annual Assessment of Business Activity

Investments

According to the results of the [CCIS Survey on Business Activity of the Domestic Economy](#), the surveyed companies in construction industry state that in the structure of investments the following items have the largest share: construction buildings (41.7% of realized investments in 2023, i.e. 33.3% of total planned investments in 2024), domestic equipment (25.3% of realized investments, i.e. 27.9% of total planned investments), and are least interested in investing in intellectual property (only 2.5% of the realized investments in 2023, i.e. 3.6% of planned investments in 2024).

Financing

In 2023, the largest number of the surveyed companies in construction industry mainly used their own assets in business operations (78.9%) and loans (15.5%). Budget incentives (3.6%) and other sources of financing (2.0%) have a negligible share in the structure of sources of financing.

Incentives

In 2023, the incentives of state institutions and local self-governments were used by 9.1% of the surveyed companies in construction industry, whereas 84.4% of the respondents stated that they did not apply for these funds.

The number of the surveyed companies in construction industry is indicated by the letter "n" (sample size).

ECONOMIC ACTIVITY

Macroeconomic Overview

According to the latest World Bank Report on Global Economic Prospects, as the middle of the current decade approaches, which was marked as a decade of transformation for the world economy at the beginning of the new economic cycle, given that it was estimated to represent a breakthrough in economic development, the global economy will achieve a negative record by the end of 2024: the slowest GDP growth in the last 30 years. Nevertheless, after the end of another business year, the global economy is definitely in a better place than it was a year ago: the risk of a global recession has receded, primarily due to the strength of the U.S. economy, whereas global inflation is generally stabilized due to an aggressive monetary policy. However, growing geopolitical tensions could create new short-term hazards for the world economy, whereas the medium-term outlook for many advanced economies is not very optimistic, primarily due to the slowdown in growth in most advanced economies, slow global trade and disincentive financial conditions. Global trade growth in 2024 is expected to be only half the average of the decade before the Covid-19 pandemic. The World Bank expects global growth to slow down for the third consecutive year – from 2.6% in 2023 to 2.4% in 2024, nearly 75 basis points below the 2010s average. Advanced economies expect economic activity to grow by 1.2%, whereas developing economies will record growth of 3.9% in the current year, which is about 1 p. p. below the decade average. Meanwhile, borrowing costs for developing economies, especially the ones with poor credit ratings, are likely to remain very high, with global interest rates remaining at their highest levels in four decades in inflation-adjusted terms.

According to the previous data, the global slowdown caused by the Covid-19 pandemic and the Ukrainian crisis had fewer negative consequences for Serbia as compared with the most European countries, primarily due to the economic structure, macroeconomic stability, as well as the previously created fiscal space from which state financial aid to businesspeople originated. The economy of Serbia achieved a growth of 2.5% in 2023 measured by the **real growth rate of gross domestic product**, which can be characterized as a relatively good economic result, bearing in mind all the economic and geopolitical challenges in that year. International financial institutions such

GDP growth/decline projection for the world's largest economy for 2023, 2024 and 2025 (in %)

Source: IMF.
(p – projection)

Change in the price of energy, metals and the most important agricultural products in December 2023 compared to the beginning of the year, in %

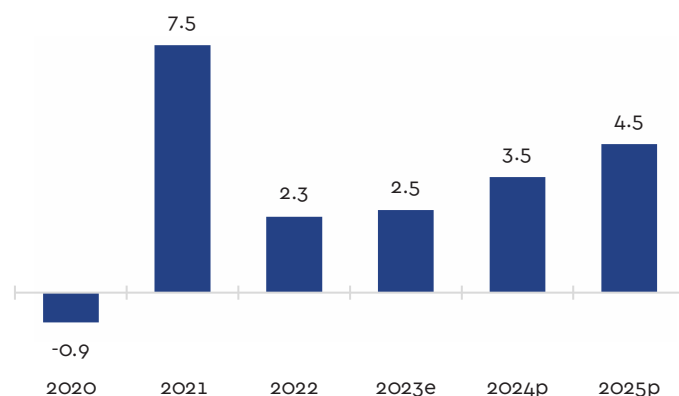

Source: Bloomberg L.P.

as the World Bank and IMF, estimate the growth of the Serbian economy at 3.5% in 2024. According to the latest projection of the National Bank of Serbia, an acceleration of the real GDP growth of Serbia is expected in the range of 3.0% to 4.0%, with the central value of the projection of 3.5%. In 2024, the growth will be driven by growth in domestic demand: higher private consumption will be driven by further growth in employment and salaries and investment growth will be driven by implementation of projects in the field of transport, energy and communal infrastructure. The NBS projects that, due to the expected growth of investments and private consumption, imports will grow faster than exports, which will result in negative net export. The growth projection for 2025 and 2026 was corrected upwards by the leading monetary institution of Serbia, in the range of 4% to 5%, due to the expected realization of the investments planned for implementing the specialized exhibition EXPO 2027.

The major challenges faced by the population in Serbia, in 2024, are disruptions in demand and supply of the staple food making up the main consumer basket of every consumer. It is mitigating that the prices of these products are kept under control, and to a certain extent stabilized. However, it should be taken into account that these are short-term instruments, which can have adverse effects in the long run. On the other hand, this year's target growth rate is affected by high inflation, tight monetary conditions, which slow down the lending activity of corporate and citizens, geopolitical risks (the Ukrainian crisis, the latest situation in the Middle East), rising tensions in Kosovo and Metohija, disruptions in global supply chains, etc.

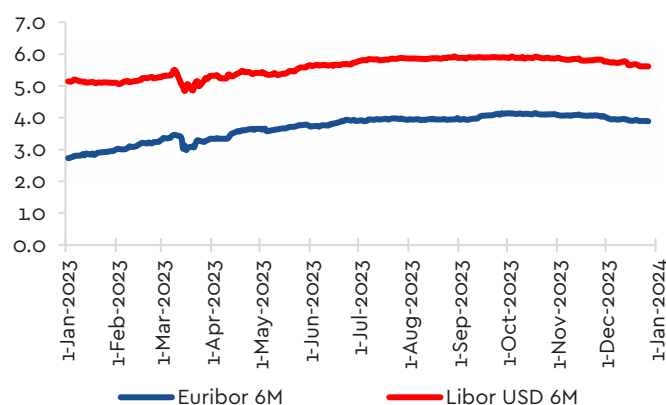

The reference interest rate has been increased six times in 2023 and currently amounts to 6.5% (since July 2023). The trend of maintaining high interest rates is in effect in a large number of economies all over the world, regardless of their level of development, and it represents an effective instrument for curbing high inflation in a situation of increased economic (and geopolitical) risks. Interest rates, inter alia, increased by 25 and 50 basis points so that investment activity would not be jeopardized.

Interest rates trend in Serbia in 2023

Source: Bloomberg L.P.

Trends in key interest rates in Serbia, Eurozone and USA in 2023

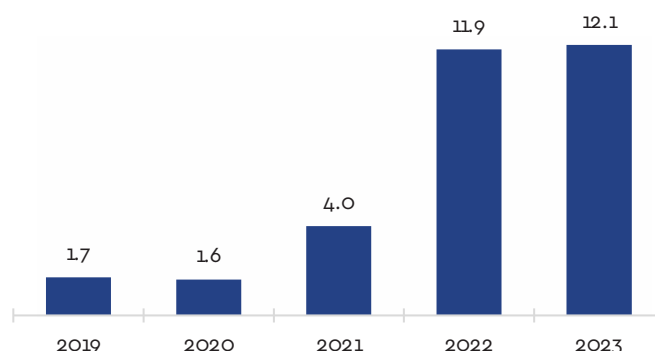

Source: Bloomberg L.P.

In the period January–December 2023, the **inflation** amounted to 12.1%, which is considerably above the NBS target limit (3.0% ± 1.5 percentage points). In December 2023, as compared to the same month in 2022, the inflation amounted to 7.6% which shows that it is gradually approaching the target range, but that the process will be very long and slow. The high inflation in this period of the year was mainly driven by the increase in the prices of food and non-alcoholic beverages, as well as the increase in the prices of energy sources. According to the NBS projection, inflation reached its maximum in the first quarter of 2023 and it has been declining since April returning to a single-digit level in October and slowing to 8.0% YoY in November. Inflation will decline throughout the projection period – its return to the target range is expected in mid-2024, and it is expected to approach the central value of the target at the end of the year. According to the results of the *Ipsos* survey as of August 2023, the inflation expectations of the financial sector one year ahead are on the decline (*Ipsos* November 5.7%, *Bloomberg* December 4.5%), whereas expectations for the next two and three years are lower and are within the NBS target limit.

According to the data of the Ministry of Finance, a **consolidated budget deficit** of about EUR 1.5 billion was recorded in the period January–December 2023. At the end of December 2023, the **share of public debt in the GDP of Serbia** was 52.3%, which is a decrease of about 2.8 percentage points as compared to the level in December 2022. The medium-term fiscal framework envisages a gradual reduction of the general government deficit to 1.5% of GDP by 2024 and maintaining the share of public debt in GDP below the Maastricht limit (60%). On the other hand, the Fiscal Strategy envisages a budget deficit of 2.8% of GDP in 2023.

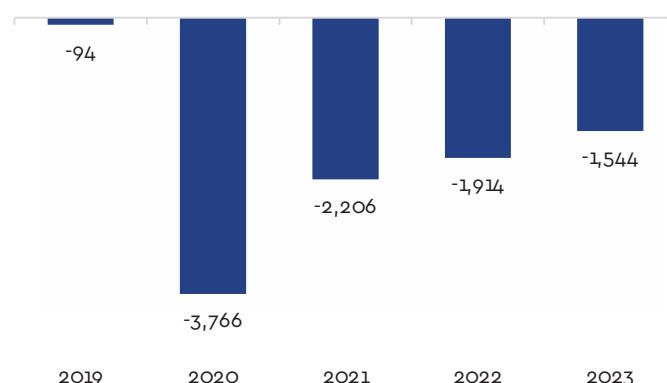

In 2023, all three credit rating agencies (*Fitch Ratings*, *Standard and Poor's*, *Moody's*) confirmed Serbia's credit rating to be by one level below the investment (BB+, BB+, Ba2) with the stable prospects for further improvement in the coming period. S&P states the international business environment is still uncertain, however, Serbia manages to balance external challenges by positive trends and adequate economic policies. The Agency states that the stable Serbia's prospects for further increase of its credit rating take into account the

fact that the national economy continues to record a growth, although the economic activity slows down in the Eurozone countries, which are our most important trade partners, such as Germany and Italy.

In the period January–December 2023, the **industrial production** increased by 2.5%, as compared with the same period in 2022. The highest growth in production was recorded in the electricity, gas, steam and air conditioning supply sector (12.7%), whereas the manufacturing industry recorded the lowest rise (0.7%). A 0.1% decrease in the production was recorded in the mining sector in the same period.

The total **foreign commodity trade** of Serbia, in the period January–December 2023, amounted to EUR 65.5 billion, which is a decline of 1.7% as compared with the same interval of 2022. Goods were exported in the value of EUR 28.6 billion, which is an increase of 3.6%, while the imports of goods amounted to EUR 36.9 billion, with the recorded year-on-year drop of 5.4%. The commodity trade deficit amounted to about EUR 8.3 billion, whereas the coverage of imports by exports increased year-on-year by 7 percentage points and amounted to 77.5%. The deficit decreased by 27.2% at the year-on-year level, primarily as a result of a drop in the price of energy sources in the global market, as well as lower supply of raw materials and materials for production such as fertilizers, metal ores, and other products.

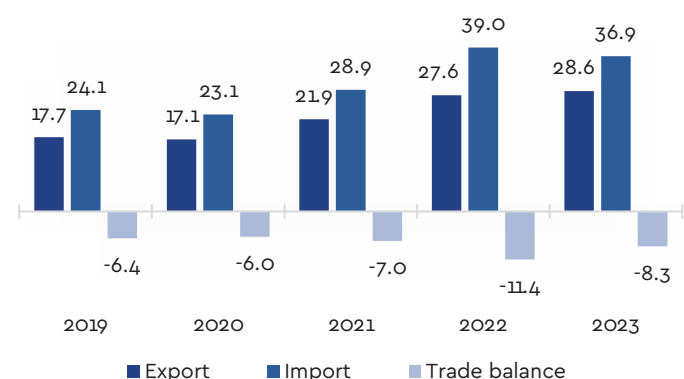

In the period January–December 2023, Serbia reached the **surplus in trade in services** of EUR 3.0 billion, with the year-on-year increase of 30.4%. Taking into account the progressive development of this sector in recent years, it is reasonable to expect the year 2023 to be a new record year when it comes to surplus in trade in services, primarily owing to telecommunication services, computer and information services (ICT sector). ICT sector in Serbia, except for recording excellent export results, increasingly contributes to the total growth in turnover, total number of employees and gross domestic product, i.e. increasing gross domestic product. In addition to them, business services (management counselling, research and development, and other technical services) make the largest contribution to reducing the deficit in trade and payment balance of the country.

Surplus in trade in services (in EUR billion)

Source: NBS.

In the period January–December 2023, Serbia attracted totally EUR 4.2 billion of **net foreign direct investments**, which is the year-on-year decline of 2.5%. FDI is geographically diversified, as well, with a growing participation of countries from the European Union and the Asia-Pacific region.

According to the data of the NBS, in the period January–December 2023, **the current account balance of payment deficit** amounted to EUR 1.8 billion, which is a significant change having in mind that in 2022 a deficit in the amount of EUR 4.3 billion was recorded. However, the last year's deficit to a large extent has been determined by high price of energy sources in the global market, and has been suffering strong pressures of the current geopolitical risks since the beginning of last year. In 2023, the current account balance of payment deficit is expected to account for about 3.0% of GDP of the Republic of Serbia, which is a significant downward correction of the previous projection (3.3% of GDP) due to lower import prices of energy products and strong export growth. The IMF also agrees with this current account deficit projection in its latest report in October. In 2024, it is expected that the current deficit will be determined by the growth of investments and that it will make up about 2.2% of GDP. The current account balance of payment deficit in Serbia has been fully covered by a net FDI inflows since 2015, which is expected in the following years as well. In 2023, the inflow of remittances from abroad was recorded in the amount of EUR 3.9 billion, mainly from the German speaking countries (Germany, Austria, and Switzerland).

The average gross salary calculated for the period January–December 2023 amounted to RSD 118,599 (EUR 1,011), while **the average net salary** amounted to RSD 86,007 (EUR 733). As compared with the same period of the previous year, the salaries were higher in real terms by 2.4%. At the same time, medial net salary for December 2023 amounted to RSD 69,842 (EUR 596), which means that 50% of employees earned the salary lower than the above amount. With the stabilization of a growth in consumer prices in 2024, higher growth in gross and net salaries in real terms should be expected.

Net FDI
(in EUR billion)

According to the **Labour Force Survey**, in 2023, the number of employees amounted to nearly 2.9 million, whereas 295.8 thousand unemployed persons were registered (a slightly drop of 0.2%, as compared with 2022). The **employment rate** of the population aged 15 and over amounted to 50.2%, whereas the **unemployment rate** was 9.4%. The labour market can be characterized as stable.

According to the data of the NBS, the domestic **lending activity** continued to slow down in accordance with the price growth in lending. The loan structure, in 2023, remained favourable in terms of its contribution to the economic growth led by loans for corporate investments and housing loans with citizens. In December 2023, the total domestic loans recorded a year-on-year growth of 1.1%. Lending activity slowed during 2023, which was influenced by higher interest rates due to the tightening of the monetary policy of the NBS and the ECB, the maturity of loans approved under the Guarantee Scheme, as well as the tightened credit standards of banks. Investment loans increased by 4.4% and in December accounted for 41.9% of total corporate loans, while the share of loans for liquidity and working capital amounted to 46.8% and was reduced due to high maturities of loans from the Guarantee Scheme. The loans granted to MSMEs account for 59.1% of the total corporate loans in December 2023. The stability of the banking sector in Serbia was maintained and additionally reinforced owing to the measures of the NBS, and the share of non-performing loans in total loans amounted to 3.0%.

The **average foreign exchange rate**, in the period January–December 2023, amounted to 117.2513 dinars to one euro, as well as 108.4143 dinars to one American dollar. Despite numerous economic and geopolitical challenges in 2023, dinar has shown substantial level of stability against the leading currency of the Eurozone, whereas it has shown certain level of oscillations against American dollar, which has been caused primarily by the current monetary policy in the global level. The National Bank of Serbia states that the stable foreign exchange rate should be expected in the coming period without large oscillations in the value against the leading currencies.

REPRESENTING INTERESTS OF THE ECONOMY

Fees and Taxes in the Area of Environmental Protection

In the market economy conditions, environmental protection is achieved by positive preventive actions of polluters, especially in the part of reduction, i.e. prevention of pollution, as well as by responsible behavior of the social community (local and regional). A normative system of revenue capture from the use of natural resources has been built in Serbia in the last few years, by applying the "user pays" principle, as well as measures to discourage negative impacts on the environment, by applying the "polluter pays" principle.

In order to achieve the goals of the environmental protection policy in the Republic of Serbia, the laws and bylaws stipulate, as one of the sources of funding, the funds charged under fees and taxes. As such, they are the revenue of the national budget, the provincial and local budgetary fund for environmental protection and are the dominant source of financing. On the other hand, fees and taxes in the field of environmental protection for business entities, as the payers of the fee, often represent a significant financial burden. However, when taking into account the great importance of prevention and protection of human health, along with the preservation of natural resources and the environment, these funds represent an extremely important investment potential to meet the needs, issues and goals of the environmental protection.

The Law on Fees for the Use of Public Goods, from December 2018, for the field of the environmental protection, defines eight fees as follows:

1. Fee for using fishing areas;
2. Fee for using protected areas;
3. Fee for collecting, using and trading in varieties of wild flora and fauna and mushrooms;
4. Fee for polluting the environment;
5. Fee for protection and improvement of the environment;
6. Fee for products that, after their usage, become special waste flows;
7. Fee for packaging or packaged products;
8. Fee for polluting waters.

Taking into consideration the importance of financing of the environmental protection, as well as the duties of the economy arising from that, an excerpt from the Law on Fees for the Use of Public Goods was developed ("Official Gazette of the RS", Nos. 95/2018, 49/2019, 86/2019 – adjusted amounts in dinars, 156/2020 – adjusted amounts in dinars and 15/2021 – additionally adjusted amounts in dinars), containing an overview of fees and taxes in this area.

Green Agenda for the Western Balkans

By signing the Sofia Declaration on "Green Agenda" for the Western Balkan countries (WB), at the WB Summit within the framework of the Berlin Process Initiative, on 10 November 2020, the countries from the region **have recognized the European green deal as a new strategy of EU growth aimed at having a modern, climatic neutral and competitive economy utilizing resources in an efficient manner.** In this way, the signatory parties to the Declaration have agreed that the elements of the European green deal should be transferred to all mutually connected priority sectors.

Almost a year after the signing of the Sofia Declaration, **the heads of the states and governments of the countries of the Western Balkans, have reached out an agreement with the EU on the implementation of the Action Plan on Green Agenda**, which opens a path to the realization of the Economic and Investment Plan for the region worth nearly EUR 30 billion.

The countries of the region have accepted the Green Agenda for the Western Balkans, thus expressing their **commitment to implementing the actions in the areas classified in five pillars**, as follows:

1. **climate, energy, mobility;**
2. **circular economy;**
3. **pollution reduction;**
4. **sustainable agriculture and food industry;**
5. **biodiversity.**

Legislative Framework of Climate Change in the Republic of Serbia

Serbia belongs to one of the regions that are most vulnerable to climate changes in the world. Estimates show that our country is warming more and faster than the global average. While the eight-hour increase in the global mean temperature is 1.1°C, Serbia is already at 1.8°C, and in summer it is as much as 2.6°C. At the same time, since 2000, the Republic of Serbia has faced several significant extreme climatic and weather episodes, which caused significant material and financial losses, as well as the loss of human lives. The total minimum amount of material damage caused by extreme climatic and weather conditions, in the period from 2000 to 2020, amounts to 6.8 billion euros. More than 70% of the damage was caused by droughts and high temperatures caused by climate change and extreme weather events. Another major cause of heavy losses was flooding.

By adopting the Law on Climate Change ("Official Gazette of the RS", No. 26/2021), the Republic of Serbia has defined one of the main components of the institutional and legal framework needed for the fight against climate change, which is the establishment of a system for reducing greenhouse gas emissions (GHG) and adaptation to altered climatic conditions.

The subject law also provides for the adoption of the Low Carbon Development Strategy of the Republic of Serbia, adoption of which, in June 2023, has given the basis for the revision of the first Nationally Determined Contribution, in relation to which the national goal of reducing greenhouse gas emissions at the level of the entire economy was tripled, and amounts to 33.3% by 2030 (compared to 1990).

SUPPORT TO THE ECONOMY

Incentives for Investments

Incentives can be awarded for investment projects in the production sector and for projects of shared service centres. Services of shared service centres and support to business operations are services provided by IC technologies mostly to the users outside the Republic of Serbia. Funds can be awarded in the sector of software development if they are in the function of product improvement or production process, or in the function of providing services of shared service centres. In addition, funds can be awarded for the investment projects in the sector of food industry and hotel accommodation in spas.

Funds cannot be used for financing investment projects in the sector of transportation, software development, accommodation and hospitality services, trade, lottery, production of synthetic

fibres, coal and steel, mining, tobacco and tobacco products, arms and ammunition, ship production of sea ships of more than 100bt, airport, utility sector, energy sector, broadband networks, fishery and aquaculture.

Type and amount of the funds that can be awarded for investments

The user of the funds is obliged to participate with at least 25% of justified costs from personal assets or other sources, which do not contain state aid. The maximum funds that can be awarded for investment projects for:

- LARGE business entities up to 50% of justified costs,
- MEDIUM business entities up to 60% of justified costs,
- SMALL business entities up to 70% of justified costs.

The amount of the funds that can be awarded for investments for large companies

justified costs of
investments

up to 50 mn EUR

up to 50%

the part of justified costs of
investments

between 50 and 100 mn EUR

up to 25%

the part of justified costs of
investments

above 100 mn EUR

up to 17%

Justified costs are investments in a material and nonmaterial asset or justified costs of labour expenses for two year period following the realization of an investment.

Terms of awarding the funds for investment projects in the sector of production and service centres are as follows:

Units of territorial level (NSJ2)	Minimal number of jobs created	Minimal amount of the funds invested (EUR)	Approved incentives	The Council can additionally approve	
			Incentives for justified costs of labour expenses for two year period	Incentives for eligible costs of investment in fixed assets	Additional incentives for labour-intensive investment projects
The region of Belgrade	50	500,000	20%, but no more than 2,000 € for every job created	+10%	more than 100 jobs created + 10% of the amount of justified costs of labour expenses for two year period
The region of Vojvodina	40	400,000	25%, but no more than 3,000 € for every job created	+15%	more than 200 jobs created + 15% of the amount of justified costs of labour expenses for two year period
The region of Sumadija, west, east, south Serbia and Kosovo i Metohija	30	300,000	30%, but no more than 5,000 € for every job created	+30%	more than 500 jobs created + 20% of the amount of justified costs of labour expenses for two year period
Service centers	15	150,000	-	-	

Right to apply for the incentives, regarding the following EXPO BELGRADE 2027 international exhibition, have the investors who want to build hotels of the category of 3 or more stars, with minimum of 50 accommodation units with that begin the construction work until the end of 2024. Minimum value of the investment has to be 5 million euros, or 2 million euros for the reconstruction of the hotel. It is necessary that investment takes place in Belgrade region and remains in the form of the hotel at least for a 5-year period. Investment incentive can be awarded up to the amount of 20% of justified expenses for the investment.

For the investments of no special purpose, additional 10% are awarded for the costs of investment in fixed assets, regardless of the level of development of municipality in which it is invested.

For investments in Food Industry, funds can be awarded only for investments of minimum 2 million euro and 30 new jobs created. The amount of incentives depends on the level of development of the municipality according to the next scale:

Level of the local government development	Approved incentives	Incentives for eligible costs of investment in fixed assets
	Incentives for justified costs of labour expenses for two year period	
I	20% but no more than 3,000 EUR for every job created	For investing up to 20 mn EUR additional 20%
II	25% but no more than 4,000 EUR for every job created	
III	30% but no more than 5,000 EUR for every job created	For investing from 20 – 40 mn EUR additional 10%
IV	35% but no more than 6,000 EUR for every job created	For investing over 40 mn EUR additional 5%
Devastated region	40% but no more than 7,000 EUR for every job created	

For investments in Hotel Industry, funds can be awarded only for investments of minimum 2 million euro and 30 new jobs created. The amount of incentives depends on the level of development of the municipality according to the next scale:

Level of the local government development	Approved incentives	Incentives for eligible costs of investment in fixed assets
	Incentives for justified costs of labour expenses for two year period	
I	20% but no more than 3,000 EUR for every job created	For investing up to 30 mn EUR additional 20%
II	25% but no more than 4,000 EUR for every job created	
III	30% but no more than 5,000 EUR for every job created	
IV	35% but no more than 6,000 EUR for every job created	For investing over 30 mn EUR additional 10%
Devastated region	40% but no more than 7,000 EUR for every job created	

Besides state subsidies there are other types of benefits that investors can acquire like custom benefits for new equipment, various tax incentives, benefits from free trade agreements that Serbia has signed with other countries etc.

Incentives can be awarded to a company from food industry, for the realization of the investments in automatization of the existing capacities if the minimum amount of the funds invested is 1.000.000 euros. The deadline for completing the investment is three years with the possibility of extending it to five years. The investor can get 20% of the justified costs, but only after the public invitation for applications is announced on the web site of the Development Agency of Serbia or Ministry of Economy.

According to Regulation on criteria for awarding incentives in automatization of the existing capacities

and innovations funds can be awarded for investment projects in the field of Industry that create great added value and which include automatization of production process or create innovation. When investing in automatization of the process, user can get 25% of justified expenses for investing in material and non material assets. Condition to be fulfilled is that amount of the investment is over 5 million euros.

More information about this you can find in our publication [Benefits for investors](#).

Level of Development of Local Governments

-  I group: GDP pc of the region is above the average GDP pc of the Republic of Serbia
-  II group: GDP pc of the region is between 80-100% of the average GDP pc of the Republic of Serbia
-  III group: GDP pc of the region is between 60-80% of the average GDP pc of the Republic of Serbia
-  IV group: GDP pc of the region is between 50-60% of the average GDP pc of the Republic of Serbia
-  V group: GDP pc of the region is below 50% of the average GDP pc of the Republic of Serbia

Center for Digital Transformation of the Chamber of Commerce and Industry of Serbia

As a response to the challenges of the global trend of digitalization, the Chamber of Commerce and Industry of Serbia, with the support of GIZ, established the Centre for Digital Transformation (CDT), as an instrument to support the MSME sector in the process of digital transformation. CDT enables to respond in an efficient and transparent way to all challenges of economy digitalization, through education, consulting, as well as creating strategic partnerships with technology promoters, on the one hand, and companies that would apply these solutions in their business, on the other. The project of establishing and developing the Centre for Digital Transformation is supported by both the GIZ – German Organization for International Cooperation and the Austrian Chamber of Economy – WKO.

For five years of operation, CDT has directly aroused interest of nearly 3,000 companies in the CDT programme, and a significant number have implemented technological solutions developed through consulting with CDT certified consultants (68 consultants trained and certified according to ISO 17024 standard).

The specialized **online Digital Academy** is an interactive platform designed primarily for the education of owners and managers in micro, small and medium enterprises in Serbia, who want to improve their knowledge and skills in the domain of digital transformation. All those interested can apply through the website www.digitalnaakademija.rs.

Support to Innovation

The Innovation Service of the Chamber of Commerce and Industry of Serbia is engaged in the process of development, promotion and improvement of the institutional framework for the innovative ecosystem in Serbia. It also provides information on available funding sources, seminars, workshops on innovation and intellectual property rights. It actively cooperates with the competent state institutions: Ministry of Education, Science and Technological Development, Cabinet of the Minister without Portfolio in charge of Innovation and Technological Development, Fund for Innovation Activity, Intellectual Property Office and others.

The [Council for Cooperation between Science and Economy](#) was established within the Innovation Service, as an expert consultative body of the Management Board of the Chamber of Commerce and Industry of Serbia. Members of the Council are representatives of the business sector, universities, research organizations, ministries, institutions that fund innovations and infrastructure support companies, which are recognized for their engagement and commitment to creating an innovative ecosystem that stimulates the emergence and development of high-tech and fast-growing companies at the national, regional and local level in Serbia. A platform of the Council for Cooperation between Science and Economy (www.nip.rs) has been created, which promotes cooperation and achieved results of all players in the field of innovation, where all relevant information can be found.

Since 2020, the Innovation Service has established the Open Innovation Club within with the aim of encouraging cooperation between large and medium-sized companies with domestic start-ups and small enterprises, and supporting the development of the domestic market and the development of new solutions. As a partner in the organization of the Competition "Best Technological Innovation", the Service is active in introducing the members to new approaches and technologies in business and raising awareness of the importance of the economy based on knowledge and innovation.

ATA Carnet – Your Passport for Goods – Saves Time and Money

Do you want to conquer new buyers and markets in Serbia, participate at international trade fairs and exhibitions, sports tournaments, exhibit your samples, do a business with your professional equipment, exhibit artwork, or participate in international music festivals?

You need to cross a border quickly and simply, without paying customs duties or giving special guarantees – ATA CARNET ensures you do this!

What is an ATA Carnet? ATA Carnet is the simple international customs document used for temporary importation of goods into a foreign country with the validity period of up to one year.

The advantages of ATA Carnet: one document for all customs transactions (temporary exportation, importation, transit), obtained at your National Guaranteeing Association (NGA) valid for a period of one year, a wide spectrum of goods, no deposits and guarantees, time and money saving, simpler procedure at the customs.

The type of goods that mostly require ATA Carnet: goods for exhibitions and fairs, broadcasting equipment, scenography, hand tools, measuring instruments, samples of clothes and footwear, sport equipment for sport events, music instruments, animals for exhibition, race or training, cultural events, artworks, medical, scientific, educational equipment and many others.

Passport for goods

Under ATA Carnet it is forbidden to export or import consumable and perishable goods, goods intended for processing, finishing or repairing.

Year	Number of issued ATA Carnets (in Serbia to the World)	Value of goods temporary exported	
		in RSD	in USD
2023	4,726	6,688,743,551	61,914,466
2022	4,342	6,142,313,684	57,229,475
2021	3,120	3,986,887,886	38,488,341
2020	2,131	2,336,820,461	24,155,205
2019	4,894	5,986,126,330	56,692,332
2018	4,558	6,094,548,352	58,371,700

By the number of ATA carnets issued, the Chamber of Commerce and Industry of Serbia currently ranks **ninth in the world** out of a total of 78 members of the ATA system. Since 2004, when the Chamber of Commerce and Industry of Serbia joined the ATA system, more than 5,000 legal entities and 3,500 individuals have used the ATA carnet.

As of October 5, 2023, the Chamber of Commerce and Industry of Serbia has been issuing both **paper and digital ATA carnets (e-ATA)**. Users receive and store these documents in digital form on their electronic devices. The complete digitalization of the entire process and the official use of e-ATA will follow the digitalization of most customs offices in the ATA system member countries.

How to obtain an ATA Carnet?

Please find a [National Guaranteeing Association \(NGA\)](#) in your country, and contact your ATA manager.

Ensure Yourself a Successful Business Worldwide

Do you want to have a fruitful cooperation with the countries abroad? Do you need a legal security? Are you fatigue from excessive documentation?

You need a quick, efficient and simple solution for a fruitful cooperation abroad – it is ensured with the publications of the International Chamber of Commerce Serbia (ICC Serbia)!

What is ICC? ICC is **the oldest and biggest business association** established in 1919. ICC counts 6.5 million members from 130 countries all around the world. ICC operates for the benefit of the open global economy on creation and production of international rules and standards, as well as on adoption of recommendations for solving issues. The ICC rules are recognized worldwide, and represent a successful business standard that substantially reduces business costs and uncertainty. Best experts and practitioners from the entire world gathered by ICC are involved in the elaboration of these rules. The Chamber of Commerce and Industry of Serbia is the founder of the National Committee of the International Chamber of Commerce from Paris. Our country membership in ICC dates back to 1927.

Best-selling ICC Publications

The International Chamber of Commerce Serbia has been facilitating for years now business operations to Serbian businessmen trading abroad. With its exclusive right to publish, the National Committee of the International Chamber of Commerce Serbia has the great pleasure of presenting to you the best-selling bilingual publications (English/Serbian) of the International Chamber of Commerce from Paris:

- **ICC Uniform Rules for Demand Guarantees including model forms – URDG 758** – clear, precise, and comprehensive URDG rules for independent guarantees that represent the international practice of usage of demand guarantees, level legitimate interests of a beneficiary, applicant, and guarantor.
- **ICC Uniform Rules for Bank-to-Bank Reimbursements under Documentary Credits – URR 725** – the rules for reimbursements are to aid banks regarding reimbursement issues or reimbursement undertaking.
- **ICC Uniform Rules for Collections with comments – URC 522** – contains a text of uniform rules for collections and comments of every member; comments are guidelines to practical issues faced by all participants in collection operations, and their role in the international trade;
- **International Standard Banking Practice for the Examination of Documents under Documentary Credits – ISBP 681** – the interpretation of the provisions of the ICC uniform customs and practice for documentary credits; it involves an overview of bills of exchange, insurance documents, certificates of origin, and other documents relating to credits.
- **ICC Uniform Rules for Bank Payment Obligations** – enable banks to reduce risks in international trade for the benefit of buyers and sellers; they are intended for bankers, salesmen, lawyers, and all practitioners.
- **ICC Uniform Customs and Practice for Documentary Credits – UCP 600** – contain significant provisions in the field of transport, insurance, and compliance that make up the base for documentary credit transactions. UCP involves Article "Definitions" for the purpose of explaining the key terms, then changed practice for rejection warning, and other amendments. In addition, it includes eUCP Version 1.1. – 1. 2. of Articles that are supplement to UCP governing the document presentation in an electronic form. The UCP rules are vital components in international trade, and as such they are necessary for bankers, companies engaged in foreign trade, transport, freight forwarding, as well as for lawyers, academicians, and all others operating with documentary credits.
- **Incoterms 2020** – the official ICC rules for the interpretation of trade terms reflect the business practice recognized all around the world; they have existed since 1936, and have been revised every ten years in compliance with new international trade tendencies; they are a part of the recognized cannon that defines buyers and sellers' obligations.

- **ICC Model International Sale Contract** – a flexible and clear contract model that provides buyers and sellers with instructions, and contains the general and specific terms and conditions.
- **ICC Short Form Model Contract** – a short form of contract that covers the essence of contract on representation and distribution. These contract models contain general and specific conditions with comments on specific issues and a test of applicable business needs.
- **ICC Model International Franchising Contract** – a contract model that provides franchising participants with a universal international recognized contract form that protects rights and defines obligations of franchising participants. To that end, the contract includes most used clauses in franchising contracts, proposes possible solutions where individual ones are not possible, enables contract parties to involve special requests in certain points, provides an Annex that parties can amend and supplement without altering the underlying text of the contract, provides a system for resolving issues, and contains the detailed comment for explaining changeable commissions.

Western Balkan Suppliers Database – Market Access Platform

The Western Balkan 6 Chamber Investment Forum (WB6 CIF) is the joint initiative of six Western Balkan Chambers of Commerce and Industry that, in 2017, established a platform for cooperation aimed at providing a common voice of the business community, and promoting the region as the single investment destination. The mission of WB6 CIF is to open new opportunities for stronger networking of business communities within the region by removing the remaining barriers to the development of the regional economic cooperation.

To support the intraregional and international trade and exports of companies in the Western Balkans, WB6 CIF has developed the unique digital tool called [Market Access](#) that is composed of more modules with different operations and roles. It is designed for businessmen from all industries that are interested in being involved in both regional and global supply chains in the territory of Serbia, the Western Balkan region and worldwide. The Platform has been created with the funds of the EU support projects to the Western Balkan Chamber Investment Forum, whereas the [registration](#) and its usage are **free of charge** for all users.

The Supply Chain Module – regional supply chains is aimed at linking the WB6 companies interested in being involved in global and regional supply chains with multinational corporations (MNC) that are looking for new suppliers from the Western Balkan region. It is an online module through which the companies interested in can promote their products and services. The company profiles are visible on the [Platform](#) upon their registration (companies log in with their credentials and have to fill in all required fields). Following the creation of the company profile, users can browse the profiles of other companies and contact their potential partners.

CCIS Business Academy

According to best practices in Europe and the world, the Chamber of Commerce and Industry of Serbia has established a Business Academy in order to respond to the increasing needs of employees for shorter education cycles, professional training, as well as obtaining qualifications and knowledge and skills that enable them to start up their own business. The CCIS Business Academy offers areas that, taken individually, fill part of the mosaic of human knowledge, and if taken as a whole, they round off knowledge on a specific field.

Through its education programmes, CCIS Business Academy provides employees with the opportunity to acquire knowledge and skills needed to perform job well, thus reducing the gap between the knowledge acquired through formal education and requirements of professional performance of activities for specific workplace.

There are topics in the field of tax system, business skills, foreign trade, business information system security, as well as many other business areas in the sectors of industry, services and agriculture.

Dual Education

The lack of qualified experts in crafts and technical occupations that are educated in accordance with the needs of the economy is a great challenge faced by employers. At the initiative of the economy, the Chamber of Commerce and Industry of Serbia has been introducing the dual education elements into the education system of Serbia since 2013, with the aim to solving in the long term the problems with the labour force shortage faced by different industries. The initiative has resulted in the Law on Dual Education, which was adopted in November 2017 and fully implemented as of 1 September 2019.

Upon completion of the secondary vocational school, students do not have practical and applicable knowledge and skills required for the real working environment. The consequence of it is that employers have to take over the costs of training of young people on additional knowledge and skills in order to involve them into work.

The dual education is a model of secondary vocational education based on which students learn in two places: at school and in company. This model in Serbia is implemented at the secondary education level. Depending on educational profile, the students can learn in real working environment already from the first year of schooling. The students spend one, two or three days in a company weekly, which is defined by the curriculum and syllabus. The basic idea of dual education is based on the fact that theoretical knowledge is acquired at school, and the practical part of teaching takes place in companies in a real working environment.

Project Management Centre

The Project Management Centre was established in the Chamber of Commerce and Industry of Serbia with the aim to ensure the use of the EU funds in the best possible way, as well as other forms of development aid available to the Republic of Serbia, and distributed through various financial instruments. Through the regional initiatives, in the partnership cooperation with international organizations and institutions, and the CCIS Representative Offices abroad, we implement project activities intended for strengthening the capacities of the Serbian economy in both domestic and international markets.

One of the main tasks of the Project Management Centre of the Chamber of Commerce and Industry of Serbia is to provide its members with the information on opened public calls, competition procedures, as well as the possibilities for funding projects from the international development aid. Together with you, we plan and prepare projects and project documentation for participation in EU programmes, donation and other development programmes. We are your support in managing projects, and in preparing reports during the project implementation procedures. We act as your mediator in finding project partners in the country and abroad for participating in funding programmes.

Centre for Support to Investments and Public Private Partnership

Taking into account the fact that investment activity is one of the most valuable sources of the state economic growth and progress, the Chamber of Commerce and Industry of Serbia has particularly focused on providing support to domestic and foreign investors in the country, and on that occasion, established its Centre for Support to Investments and Public Private Partnership.

Among numerous activities for making decisions on investments and their implementation, the Centre for Support to Investments and Public Private Partnership takes an active role in promoting the business and investment environment of Serbia to business delegations, individual investors at investment conferences and business events organized in both the country and abroad. In addition, this Centre is also engaged in raising awareness of the importance of equal regional development.

The Centre for Support to Investments and Public Private Partnership prepares information on investment opportunities in Serbia, investment incentives, as well as the data on Serbia as an investment destination. Owing to the adopted initiative for amending the Law on Investments and supporting regulations from 2019, the Centre ensured the exemption from customs and other duties on import of equipment for domestic and foreign investors.

Cooperation with the Diaspora – connecting the economy of Serbia with the business and academic Diaspora, the analyses and implementation of priority programmes and projects in this field.

Chamber of Commerce and Industry of Serbia within the Project

Link Up! Srbija II promotes an investment online platform titled Business Atlas of Serbia and the Diaspora aimed at networking the business Diaspora with its native country in an easier and quicker way. The Platform can be utilized by anyone interested in – companies, entrepreneurs, individuals, as well as local self-governments that can offer their investment locations or, through networking, find potential partners for export of their products and services.

CSR

Corporate Social Responsibility

As one of the leaders in the idea of the corporate social responsibility (CSR) development in Serbia, we have been contributing for years to the promotion of basic CSR principles, which we believe should be an integral part of the business in any sustainable company. We organize events and education in this area, participate in the promotion of business standards related to CSR, and promote transparency in reporting.

We conduct a competition and award the most successful companies with the [National Award for Corporate Social Responsibility – George Weifert](#) and organize meetings of the [Council for Corporate Social Responsibility](#), an advisory body, which was formed in July 2016 and which includes organizations that are recognized for their engagement and commitment to the principles of corporate social responsibility.

METHODOLOGICAL NOTES

Association of Construction Industry, according to the CA (2010), includes fields of activity: Design, Construction of buildings, Civil engineering (roads, railways, utility projects for fluids, utility projects for electricity and telecommunications, water projects and other civil engineering projects n.e.c.) and Specialised construction (Demolition and site preparation, Electrical, plumbing and other construction installation, Building completion and finishing, Roofing activities and Other specialised construction activities), Architectural and engineering activities; technical testing and analysis.

Presentation of data by activity is performed according to the Regulation on Classification of Activities („Official Gazette of the RS", No. 54/10).

From 2018, the Statistical Office of the Republic of Serbia calculates average wages on the basis of data from the records the Tax Administration. The study of wages is based on the data from the Tax Return for withholding tax (form PPP-PD). Average wages are calculated based on the amount of calculated wages for the reporting month, and the number of employees, which is shown in the full-time equivalent – FTE. All categories of employees are included, for whom their employers, i.e. economic entities, submitted to the Tax Administration a completed electronic tax return form PPP-PD, with the calculated wages. Since 1999, the Statistical Office of the Republic of Serbia has not disposed of some specific data for the Autonomous Province of Kosovo and Metohija, and therefore, they are not included in the scope of data for the Republic of Serbia (total).

The term employees implies persons who have a formal and legal employment contract, i.e. the established labour relationship with the employer, for a fixed or indefinite period; persons working outside the labour relationship, based on an engagement contract or a contract on temporary and occasional jobs; persons engaged in self-employment, or founders of companies or sole trade businesses; and persons engaged in agricultural activities, who are in the records of the Central Registry of Compulsory Social Insurance. The study on the registered employment is based on the combination of data of the Central Registry

of Compulsory Social Insurance (CROSO) and the Statistical Business Register (SBR). The data on payers of the compulsory social insurance contribution and the insured, based on the work, are obtained from CROSO. The data on business entities and their main characteristics are obtained from SBR. Distribution of employees by activity, in the context of a business entity, is done according to the structures that are formed on the basis of data on local units.

Some of the values shown in the Bulletin, are rounded up to millions or billions, with one decimal place and, therefore, the total values (summaries) do not always coincide with the sum of individual data, due to the fact that non-rounded up figures were used (which gives more accurate data).

Abbreviations used: GDP – Gross Domestic Product, GVA – Gross Value Added, FDI – Foreign Direct Investment, CA (2010) – Classification of Activities (2010), Ø – Average for Period, LFS – Labour Force Survey, NPL – Non-performing Loan, MSMEs – Micro, Small and Medium Enterprises, p.p. – Percentage Point, RSD – Serbian Dinar, EUR – Euro, USD – American Dollar.

The sources of data: Statistical Office of the Republic of Serbia (SORS), National Bank of Serbia (NBS), Business Registers Agency (BRA), Chamber of Commerce and Industry of Serbia (CCIS), Customs Administration (CA), Ministry of Finance (MF), Central Registry of Compulsory Social Insurance (CROSO), International Monetary Fund (IMF), World Bank, Bloomberg L.P.

Foreign exchange rates: All conversions in the Bulletin were made according to the average medium rates of the National Bank of Serbia:

Time:	2016	2017	2018	2019	2020	2021	2022	2023

CCIS ASSOCIATION

of Construction Industry

The construction industry is a very important economic branch for the functioning of the economy as a whole. Since its inception, this economic branch has been connected with all forms of life and work. With the development of society's productive forces, construction becomes an important economic area, connected to a large number of economic activities (more than 30 activities), whose products are used as means of work or material for construction and installation in construction facilities.

Once one of the most expansive and successful export industries, the Serbian construction industry is trying to preserve its acquired reputation in the world and continue the current trend of growth of construction investments in the country.

The Association monitors the construction industry in Serbia through:

- execution of construction works – construction operative;
- housing economy;
- construction material industry.

The construction industry includes the following branches of the economy:

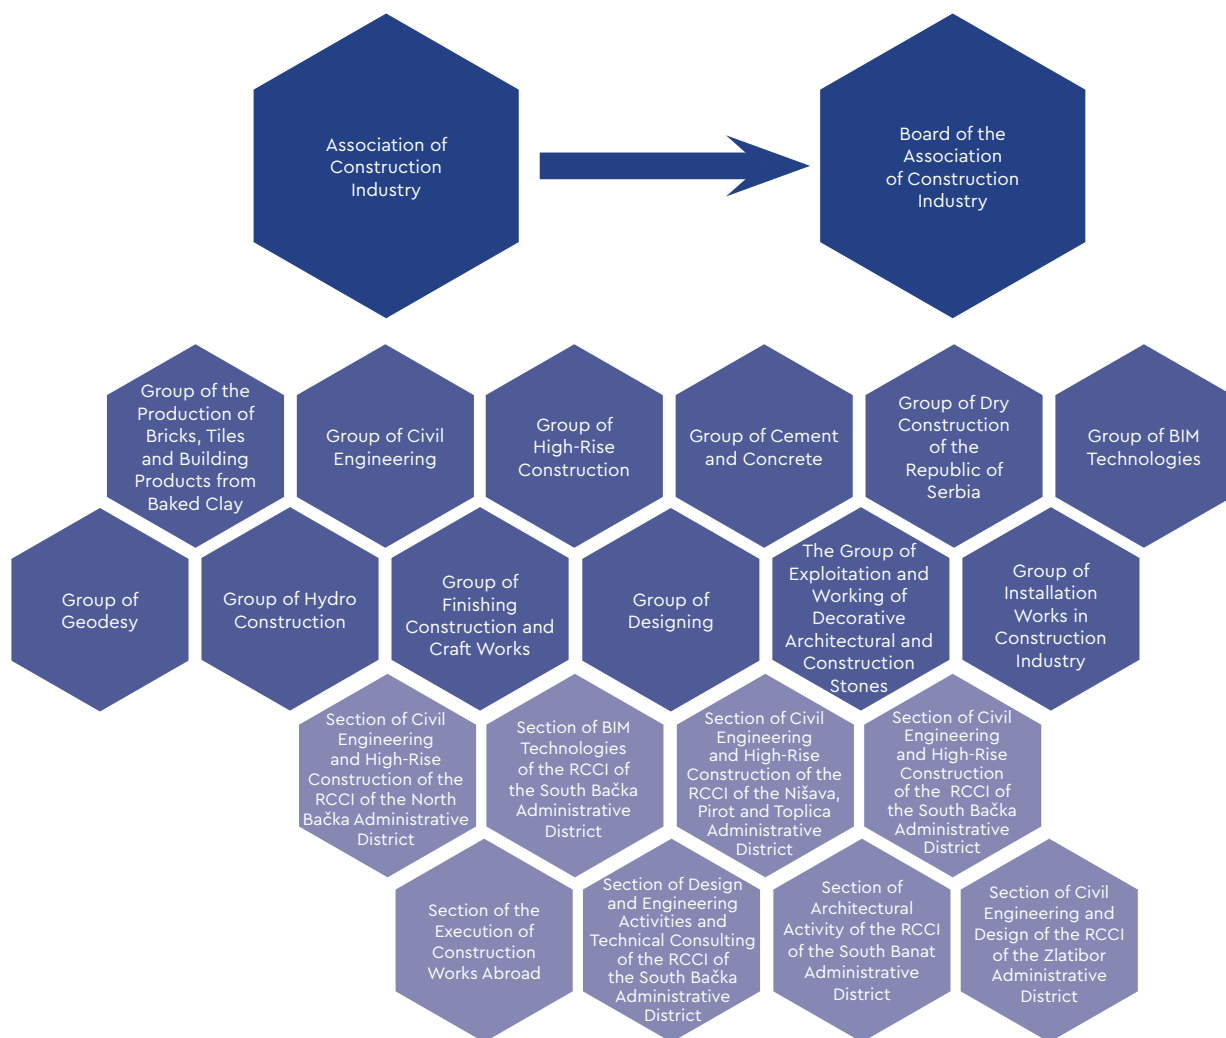

- Designing,
- High rise building construction,
- Civil engineering and hydraulic engineering,
- Craft and finishing works,
- Industry of building materials.

The Association promotes common interests of companies in the area of construction industry; participates with executive power holders in drafting legal acts; making analyses, proposals of measures for tackling current issues; organizes training courses and seminars, fairs, round tables, forums, and public debates; assists in finding information on foreign and domestic economic entities, foreign markets, product ranges, domestic legal regulations; initiates passing new laws, and amending current laws and decrees.

What can we do for you?

1. Provide contact lists against your enquiry;
2. Find producers of specific products;
3. Prepare data on foreign trade;
4. Prepare information on conditions for export/import of goods (customs tariff, prevailing trade agreements);
5. Provide financial indicators of economic entities;
6. Render professional and technical assistance in the organization of fairs;
7. Give opinion for issue of certificate that goods are not produced in the country;
8. Give opinion for issue of certificate of domestic origin of goods;
9. Give opinion on the only bidder for goods/services.
